

METAL DETECTABLE Safety Products

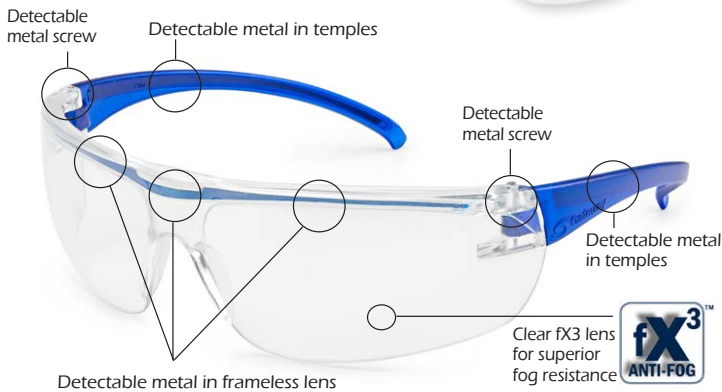

The FDA recalls almost a hundred million units of food every quarter. Food recalls carry enormous financial costs for a food company, averaging \$10M in direct costs, in addition to brand damage and lost sales. Nearly one-quarter of recalls exceed \$30 million in direct costs alone. According to the U.S. Department of Agriculture, 'foreign material' is the leading cause of food recalls.

Gateway Safety has developed several products to address this issue affecting the food processing industry. Our revolutionary technology in metal detectable safety glasses and earplugs is setting a new standard for metal detectable PPE in the industry.

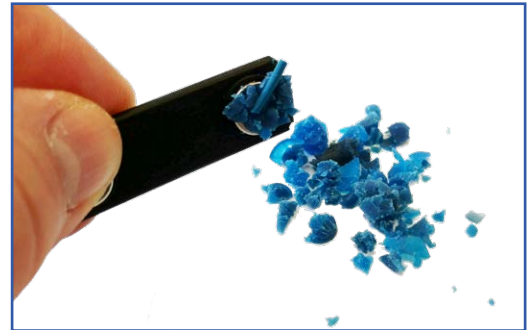

STEELYBLUES® SAFETY GLASSES

Revolutionary in design. SteelyBlues safety eyewear provides end-to-end, component-level metal detectability in a lightweight, comfortable product.

TRI-GRIP® MTEK™ EARPLUGS

Next generation technology. Made with a metal-infused resin, which is paired with a metal insert, Tri-Grip MTEk offers tip-to-tip metal detectability. Available with a detectable cord.

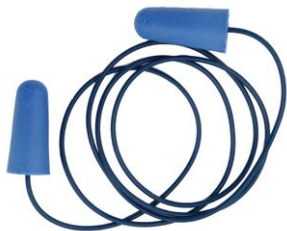

Even if the plug is shredded into pieces, each piece is metal detectable. That's MTEk.

ADDITIONAL METAL DETECTABLE PRODUCTS

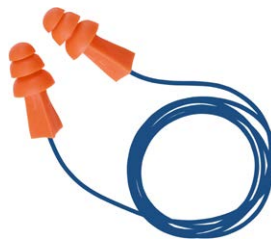

SoftSeal™ MD Earplugs:

Disposable foam earplugs with a metal insert in the plug for metal detectability, available with a metal detectable cord.

Tri-Grip® MD Earplugs:

The original Tri-Grip plug with a metal insert and a metal detectable cord.

Contra-Band™ MTEk Hearing Band:

A hearing band worn under the chin, with an MTEk metal-infused plug and a metal detectable band.
